

BOOST PRODUCTION RELIABILITY WITH STATE-OF-THE-ART GEARBOX MAINTENANCE

Unplanned downtimes can hit your business hard, unless you keep the finger on the pulse of your gearbox health. Prevent gearbox failure in an early stage and maximize uptime with eye's real-time data insights. Any time, any place.

KNOW MORE

Real-time data insights, 24/7

- Local & remote cloud-based dashboard
- Oil quality monitoring: wear, ISO cleanliness class, water saturation, cross contamination, and temperature
- Advanced vibration monitoring including time and frequency domain analyses

SAVE MONEY

Optimized maintenance & low-cost repairs

- Low repair costs
- Optimized maintenance planning & budget control
- Minimum amount of oil consumption
- Save up to five times on oil changes

MAXIMIZE UPTIME

Gearbox lifetime extension

- Higher productivity
- No unplanned downtime
- Maximized system availability
- Fast and correct decision making

ACT SUSTAINABLE

Sustainable product life cycle

- Positive effect of recycling oil
- From break & fix to sustainable product life cycle
- Curb emissions through digitalization of maintenance technology
